**SUBJECT: KEY PART OF J.P. MASCARO & SONS INFRASTRUCTURE EARNS
LARGE DISPOSAL EXPANSION**

The Keystone Sanitary Landfill situated in Dunmore, Pennsylvania has been granted an expansion permit which will allow “decades” of future disposal. This is a huge victory for the taxpayers and industry situated in Northeastern and Southeastern Pennsylvania stated, Pasquale Mascaro, President of J. P. Mascaro & Sons, the largest client of the landfill over the past 40 years.

Mascaro said everyone in the industry knows the DeNaples brothers, Louis and Dominick, operate one of the premier landfills in the country let alone Pennsylvania.

They have always been committed to environmental applications that in many cases exceed the requirements under the law.

This approval is good news for the company since Keystone is a critical component of the Mascaro infrastructure. We own and operate four of our own landfills, but due to its strategic location, our company utilizes it for many local and regional contracts. Our company looks forward to a continued long term mutually beneficial relationship with the DeNaples family as we are committed to providing our customers in the region cost effective and efficient services within sound environmental confines.
